

RUGGED TERRAIN AND TEMPERATURES OVER 100 DEGREES. AFTER 40 YEARS, WE'RE USED TO IT.

Since its founding in 1969, B&H Maintenance and Construction has been serving the largest customers in the oil and gas industry. From pipeline construction, reconditioning and maintenance to environmental services, B&H has the capability to deliver turn-key projects of all sizes. Headquartered in New Mexico, B&H operates throughout the Midwest and Western states.

B&H outfits its highly skilled in-house crews with the latest equipment to safely deliver the highest quality work to our customers. We're proud of our long standing safety rating and we continuously strive to exceed all local, state and federal industry requirements.

B&H Pipeline Services:

- Construction and maintenance of mainlines, gathering systems and distribution systems using both conventional and directional drilling methods

- Installation of steel, poly and fiberglass pipelines
- Excavations and custom ditching using dirt wheel, rock wheel and chain trenchers
- Roads and well pads for drilling rigs
- Pipeline padding for backfill operations
- Installation of all types of concrete work, from plant maintenance to pump and compressor stations
- Pipeline integrity, including hydro-testing, pigging and repair
- Installation and repair of telecommunications fiber optic cable
- Line travel shot blasting and hot doping
- Water and CO2 injection systems
- Take up, relay and hot taps
- Road bores (wet and dry)
- Right-of-way reclamation and reseeding
- Shop fabrication
- Installations of river crossings
- Custom rock trenching
- Sandblast, paint and roustabout crews

THE TERRAIN CAN BE HARSH AND THE JOB MAY BE TOUGH. BUT AT B&H, OUR FOCUS ON SAFETY AND HIGHLY-TRAINED CREWS ENABLES US TO PERFORM THE HIGHEST QUALITY OF WORK ON PROJECTS OF ALL SIZES.

(Services, continued)

B&H Environmental Services:

- Environmental assessments
- Monitoring of well installations and recovery systems
- Stabilization, remediation, soil shredding and solidification of highly contaminated soils
- Bioremediation and bioreactors

B&H Example Projects:

- 42 miles of 20" steel pipe on the American Indian Reservation, including large-bore directional drill under the San Juan River, 35 conventional road/canal bores and two major wash crossings.
- Seven miles of 24" steel pipe for a mix of residential and commercial property including an open cut in the Salt River.

- 12 miles of 4", 6" and 10" steel pipe across two 1,400 LF sections of the Pine River including miscellaneous lengths of 6" HDPE water line.
- 200 well ties for new gas wells drilled in the San Juan Basin for a major natural gas company.
- Environmental cleanup project for a large release of oil on a pipeline project in Andrews, Texas; the oil impacted soil was remediated, excavated, tested and blended with clean soil and backfilled after meeting the Texas Railroad Commission's required soil testing standards.

ENERGY SOLUTIONS YOU CAN RELY ON

Infrastrux Group is a premier national provider of electric power and natural gas transmission and distribution maintenance and construction solutions. By combining a shared strategy with decentralized execution, Infrastrux enables each company to benefit from the greater resources of the group while maintaining a commitment to local concerns and customer requirements. Our services range from turn-key solutions to highly specialized projects, each performed with careful attention to the highest-quality safety standards.
