

**THROUGH THE GREAT DEPRESSION AND WWII,
WE HELPED BRING POWER TO TEXAS AND OKLAHOMA.**

Gill Electric Service was founded in 1932 to provide residential energy to rural areas in Texas and Oklahoma. Today, we design and install distribution and transmission lines for both industrial and commercial electrification projects across the region. As a leading contractor in the region, we have served more than 40 cooperatives and investor-owned utility customers. Our leadership in industry associations and contributions to establish regional safety standards have helped make Gill Electric one of the most respected utility contractors in our region.

Safety has always been a top priority for Gill Electric. In 1971, we helped establish the Contractors Job Training and Safety Association for contractors in Texas and Oklahoma, which is credited with significantly reducing accidents. This association eventually became the model for the National Power and Communication Contractors Association Safety Program.

Gill Electric Overhead Distribution Services:

- Engineering, construction and installation of overhead distribution lines from 7.2kV to 35kV
- Specialty work on energized lines
- Repair and maintenance

Gill Electric Substation Construction Services:

- Complete substation build-outs, enlargements and modifications including additional transformers, multiple distribution bays and voltage upgrades

Gill Electric Overhead Transmission Services:

- Installation of transmission lines up to 138kV
- Construction and replacement of wood, concrete and steel poles
- Lattice tower construction, repair and maintenance

AS A LEADING CONTRACTOR IN TEXAS AND OKLAHOMA, GILL PROVIDES A STABLE WORKFORCE THAT DRAWS ON THE EXPERIENCE OF A LEADERSHIP TEAM THAT HAS BEEN WITH US FOR MORE THAN 250 YEARS COLLECTIVELY.

Gill Electric Example Projects:

- Over a 40-year period, we have constructed hundreds of miles of distribution lines in North Central Texas.
- Over a 30-year period, we have built hundreds of miles of transmission lines and dozens of substations across north central Texas.
- Over a 20-year period, we have built multiple transmission lines and substations that feed cooperatives in Texas and Oklahoma.
- We engineered, built and installed all distribution lines and transformer banks for the irrigation system at a North Texas facility.

ENERGY SOLUTIONS YOU CAN RELY ON

Infrastrux Group is a premier national provider of electric power and natural gas transmission and distribution maintenance and construction solutions. By combining a shared strategy with decentralized execution, Infrastrux enables each company to benefit from the greater resources of the group while maintaining a commitment to local concerns and customer requirements. Our services range from turn-key solutions to highly specialized projects, each performed with careful attention to the highest-quality safety standards.
